

Bagisto Regal Theme

Bagisto is an open-source eCommerce platform built on the Laravel PHP framework. Bagisto provides a framework for developers and businesses to create their own customized eCommerce websites and online stores. It is designed to be highly modular and flexible, allowing developers to build and customize eCommerce solutions tailored to their specific needs.

Regal – Multi-Purpose Responsive Bagisto Theme is flexible and smart design. This theme is the perfect choice for people who want to build a website in Bagisto with the unique design. Regal is a professional, super fast and light modern Bagisto theme that can enhance the look and functionality of your eCommerce store. Regal is suitable for every type of store, easy to use and easy to customize. Regal theme offers a wide range of features and design options to give your eCommerce store a professional, modern look.

Regal Theme Features:-

- Regal is responsive, powerful and modern multipurpose Bagisto theme.
- Fully Customizable Design.
- Supports Multi-locale.
- Supports Multi-currency.
- RTL supported.
- New products slider
- Featured product slider
- Create a custom mega menu.
- Add custom banners on the home page.

How to install Regal theme

Install Regal package:

- Create a directory named **“Mega”** inside the **packages** folder in the root of the Bagisto installation.
- Inside the **“Mega”** folder, extract the **“Regal”** package.
- Now we will register our regal package. To do this go to the app.php file inside the config folder in root of Bagisto installation.

```
$providers = [  
  
    'Mega\Regal\Providers\RegalServiceProvider::class  
  
]
```

- Now we will add our package to **composer.json** which is located at the root of Bagisto installation.

```
"psr-4": {  
  
    "Mega\\Regal\\": "packages/Mega/Regal/src"  
  
}
```

- After the above code is added run below command in the terminal in your Bagisto root directory

```
composer dump-autoload
```

- Run the `php artisan vendor:publish` command to publish files of "publishable" folder to the /public folder.
